

POSITION DESCRIPTION

IT Service Desk Engineer

Employment Type:	Full time, Permanent
Portfolio:	IT Managed Services
Reports to:	Delivery Manager - Support

About Infoxchange

Infoxchange is a not-for-profit social enterprise that has delivered technology for social justice for 30 years. With over 130 staff across Australia and New Zealand we tackle the biggest social challenges through the smart and creative use of technology.

We work with community, government and corporate partners to solve family violence, homelessness, mental health and issues facing people with disabilities, the elderly, Aboriginal, Torres Strait Islander, Maori and Pasifika communities.

Our products and services are used by 8,800 organisations across the community sector. We provide the right tools to improve efficiency and deliver greater impact – from nation-wide case management and service coordination systems to IT services and advice for individual organisations.

Our community programs focus on digital inclusion – using technology to improve the lives of people experiencing disadvantage, driving social inclusion and creating stronger communities. We believe no-one should be left behind in today's digital world.

In November 2018, Infoxchange joined forces with Connecting Up to create Australia and New Zealand's leading not-for-profit dedicated to using technology to improve the lives of people experiencing disadvantage and the organisations that support them.

The integration brings together 150 staff members working to support more than 30,000 not-for-profits and over 2 million people in need each year across Australia and New Zealand.

Connecting Up has become a subsidiary of Infoxchange and will continue to trade as TechSoup New Zealand to serve the not-for-profit sector in New Zealand.

About the role

The 'IT Service Desk Engineer' is responsible for providing high quality ICT services to internal Infoxchange staff and external Infoxchange clients.

The IT services team primarily provides installation, management and support services for computers running Microsoft operating systems and software. Services include:

- Managed support services - remote and onsite support of desktops, servers and networks

- Migration, management and support services for clients who use Online Services such as Microsoft Office 365
- Proactive maintenance
- Design and implementation of IT infrastructure solutions
- Provision of technical advice and improvement recommendations.

Clients are supported through managed support contracts, projects and casual (as-required) support activity.

This role reports to the Delivery Manager - Support and works closely with the other members of the Managed Services team.

This position could be delivered from either our Melbourne, Adelaide or Brisbane offices and a driver's licence is required for this role.

The key objectives of this role are to help organisations improve their digital capability and use ICT efficiently and effectively by providing IT services which satisfy our customers and are:

- Cost effective
- Professional
- Timely
- Efficient

The key responsibilities are, but not limited to:

1. Service Desk (70%)

- Provide excellent first level support services to IT Services clients in a professional and positive manner
- Undertake maintenance activities for IT Services clients desktops and servers
- Build and deploy PCs for clients
- Maintain and update documentation

2. Projects (15%)

- Support IT projects with required activities, including desktop deployments and maintenance of documentation

3. Capability Development (15%)

- Archive utilisation targets
- Develop and improve Infoxchange services, procedures and documentation
- Share knowledge and experience with other Infoxchange staff
