

POSITION DESCRIPTION

Senior Systems Engineer

EFT:	Full time, Permanent (we are a flexible work-place and part-time will be considered)
Portfolio:	Community Sector Products & Services
Reports to:	Manager – Service Delivery

About Infoxchange

Infoxchange is a not-for-profit social enterprise that has delivered technology for social justice for 30 years. With over 130 staff across Australia and New Zealand we tackle the biggest social challenges through the smart and creative use of technology.

We work with community, government and corporate partners to solve family violence, homelessness, mental health and issues facing people with disabilities, the elderly, Aboriginal, Torres Strait Islander, Maori and Pasifika communities.

Our products and services are used by 8,800 organisations across the community sector. We provide the right tools to improve efficiency and deliver greater impact – from nation-wide case management and service coordination systems to IT services and advice for individual organisations.

Our community programs focus on digital inclusion – using technology to improve the lives of people experiencing disadvantage, driving social inclusion and creating stronger communities. We believe no-one should be left behind in today's digital world.

In November 2018, Infoxchange joined forces with Connecting Up to create Australia and New Zealand's leading not-for-profit dedicated to using technology to improve the lives of people experiencing disadvantage and the organisations that support them.

The integration brings together 150 staff members working to support more than 30,000 not-for-profits and over 2 million people in need each year across Australia and New Zealand.

Connecting Up has become a subsidiary of Infoxchange and will continue to trade as TechSoup New Zealand to serve the not-for-profit sector in New Zealand.

About the role

The Senior Systems Engineer is responsible for implementation of technical solutions for the Consulting & IT Services team, ensuring our services are viewed by clients as 'best in class'; enabling staff and volunteers to work effectively and offering excellent value for money.

The Consulting & IT services team provides technology services for non-profit clients including:

- » Technical advisory and architecture services

- » Design and implementation of ICT infrastructure including solutions based in the cloud, local infrastructure and hybrid environments
- » Office 365 migrations
- » Managed desktop and infrastructure services Clients are supported through managed support contracts, projects and casual (as-required) support activity.

This role reports to the Team Leader, Engineering, and works closely with the other members of the Engineering, Consulting & Support teams.

The role provides support to the IT Services team in regard to technical solutions and particularly network technologies. This position is located at the Richmond, Melbourne head office and a driver's licence is required for this role.

The key objectives of this role are to provide technical design, delivery and support of services from the IT Services team to Infoxchange clients.
